

Parte 1 – Passive Voice

A. Transforma las oraciones a voz pasiva

- The developer fixed the security bug.
- The company releases updates every month.
- The QA team tested the application yesterday.
- Someone stole the user credentials.
- The administrator will restart the server.

B. Identifica el tipo de voz pasiva

Opciones:

- Passive with agent*
- Passive without agent*
- Impersonal passive*

- The files are uploaded automatically.
- The database was protected by the firewall.
- It is expected that the software will improve performance.
- The system was created by a team of developers.
- The server was rebooted.

C. Traduce al español

- User data is protected by encryption software.
- The application has already been tested.
- The server was restarted immediately.
- The next version will be released next month.

Parte 2 – Tiempos Perfectos

A. Completa con el tiempo perfecto correcto

- The programmer _____ already _____ (solve) the problem.
- They _____ (test) the application since Monday.
- The system _____ (crash) before the backup started.
- By next week, we _____ (finish) the project.
- She _____ never _____ (use) that framework before.

B. Traduce al inglés

- El desarrollador ha actualizado el sistema.
- Hemos estado trabajando en el código durante horas.
- El servidor había fallado antes del mantenimiento.
- Para mañana, habremos terminado la aplicación.

C. Reconoce el tiempo verbal

- The engineers have fixed the error.
- She has been programming all morning.
- The application had stopped unexpectedly.
- By Friday, they will have deployed the software.

Opciones:

Present Perfect

Present Perfect Continuous

Past Perfect

Future Perfect

Parte 3 – Condicionales

A. Completa las oraciones

- If the code has errors, it _____ (fail).
- If the user enters invalid data, the system _____ (show) an alert.
- If I _____ (be) the administrator, I would change the password policy.
- If they had tested the module, the application _____ (not crash).
- If the server overheats, it _____ (shut down) automatically.

B. Indica qué tipo de condicional es

Opciones:

Zero Conditional

First Conditional

Second Conditional

Third Conditional

- If the server fails, the system shows an alert.
- If you update the software, it will work better.
- If I knew the solution, I would tell you.
- If they had installed the patch, the bug would have disappeared.

C. Reescribe usando condicionales

- The user didn't save the file, so it was lost.
→ If...
- The developers didn't test the software, so the system crashed.
→ If...
- The code contains errors, so the application fails.
→ If...

Parte 4 – Comprensión Lectora

Texto

Cybersecurity Incident

Last week, a cybersecurity attack was detected in a large software company. Several user accounts had been compromised before the security team identified the problem. The servers were immediately disconnected from the network, and new passwords were generated for all users.

The engineers had been monitoring unusual activity for several days before the attack was confirmed. If the administrators had updated the firewall earlier, the intrusion would have been prevented.

At the moment, the development team is working on new security improvements. By next month, they will have implemented a stronger authentication system.

A. Verdadero o Falso (justificar en español)

- The attack was detected last year.
- User accounts had been compromised before the problem was identified.
- The firewall had been updated earlier.
- The company is currently improving security.

B. Responder las siguientes preguntas

- What happened to the user accounts?
- What did the company do after detecting the attack?
- Why could the intrusion have been prevented?
- What will the team have implemented by next month?

C. Busca en el texto y transcribe ejemplos de:

- Passive Voice
- Past Perfect
- Past Perfect Continuous
- Third Conditional
- Future Perfect
